MORE

**“This house is designed with earthy textures, shaded courtyards around existing trees and a large water pool amidst palms, reflecting the gentle and rooted nature of the Earth.”**

*– Amita Kulkarni, Co-founder and Principal Architect, SAV Architecture + Design*

"The lines and forms of the Earth House are designed to connect with its outdoors, melding nature and all its coconut palm-filled views in a modern, fluid manner."

— Vikram Tike, Co-founder and Principal Designer, SAV Architecture + Design

**“The architecture of the Moon House is constantly shifting and shaping between nature and space, allowing it to blend seamlessly with its surroundings.”**

– Amita Kulkarni, Co-founder and Principal Architect, SAV Architecture + Design

The terrace has a 'moon observatory', with louvers that offer shade during the day and create an animated play of moonlight and stars at night.
